

Jonathan Larrea

Full Stack Developer

jdlarrea@outlook.com • Tampa, FL • linkedin.com/in/jdlarrea • jdlarrea.com

React • Next.js (App Router) • TypeScript • Tailwind CSS • shadcn/ui • Neon (Postgres) • JavaScript • WordPress (Custom Themes, ACF) • PHP • Git • CI/CD • Figma

Full stack developer with 10+ years building and leading production web projects, now focused on React and Next.js. Starting in 2026, I began building full-stack apps with the App Router, TypeScript, and Postgres databases, integrating authentication, data modeling, and real app logic. While my primary experience was founded in custom WordPress themes, I pick up new stacks quickly, and have been able to transition my business knowledge to scope realistic timelines, write maintainable code, document clearly, and work directly with clients from sales to launch.

PROFESSIONAL EXPERIENCE

Modern Duplication

Tampa, FL

Founder / Freelance Developer

Feb 2026 – Present

- Ran freelance web development business: handling client discovery, scoping, billing, and site launches from proposal through post-launch training.
- Shifted primary stack from WordPress to React, Next.js, TypeScript, and Postgres.
- Building a Food Tracker full-stack Next.js app with authentication, protected routes, and a Postgres-backed data model for logging meals, adding/editing food items, and tracking goals through multiple views.

Applied Imagination

Remote

Senior Web Developer

Jun 2022 – Jan 2026

- Evaluated design mockups and feature requests to determine scope, complexity, and budget impacts prior to client review and approval.
- Built reusable component systems for custom WordPress themes, cutting build time and making sites easier for clients to manage long-term.
- Implemented CI/CD workflows using GitHub Actions to catch errors pre-deployment, and streamline multi-dev projects.
- Onboarded and mentored new developers, guiding them through business and coding standards, and assisting with complex debugging.

Crowd Favorite

Remote

Senior Web Developer

Sep 2021 – Jun 2022

- Resolved site-crashing errors from unmaintained plugins, replacing them with custom-coded solutions.

- Conducted monthly audits to identify third-party scripts and tools that slowed site performance.
- Integrated third-party APIs to enhance site functionality and support data-driven features.

Socius Marketing

Tampa, FL

Senior Web Developer

Oct 2019 – Sep 2021

- Ensured smooth website launches across multiple hosting platforms, including DNS configuration.
- Provided project post-mortem analyses to identify and track workflow improvements.
- Created developer knowledgebase to onboard new developers quickly in coding practices and cross-department communications.

Web Developer

Jul 2016 – Oct 2019

- Coded custom theme WordPress sites, based on Photoshop and XD design mockups.
- Connected website forms with CRMs (ex. Salesforce, MarketSharp, HubSpot).
- Expanded custom base theme library by coding new, reusable modules.

EDUCATION

University of Central Florida, Orlando, FL

Bachelor of Science – Computer Science (2016)
